SOLVE SQL WITH SAYAN

DAY 2

Daily Practice Challenge

Question:

Write an SQL query to find for each date the number of different products sold and their names.

The sold products names for each date should be sorted lexicographically.

Return the result table ordered by sell_date

Example:

Input : Activities table:

sell_date	product
2020-05-30	Headphone
2020-06-01	Pencil
2020-06-02	Mask
2020-05-30	Basketball
2020-06-01	Bible
2020-06-02	Mask
2020-05-30	T-Shirt

Example:

Output:

```
+------------+----------+------------------------------------+
| sell_date  | num_sold | products                           |
+------------+----------+------------------------------------+
| 2020-05-30 | 3        | Basketball,Headphone,T-shirt       |
| 2020-06-01 | 2        | Bible,Pencil                       |
| 2020-06-02 | 1        | Mask                               |
+------------+----------+------------------------------------+
```
